REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance: One major difference of claim 5 with respect to the closest prior art, Holden (US 3,082,988) is that Holden does not teach the compression stand having a slot hole located between the shell plate and the connecting sleeve, where the threaded nut is selectively moving the rubber sucking disc between first and second positions to create a vacuum; and a pole connecting at a first end to the connecting sleeve as present in independent claim 5. Holden also does not teach or suggest any modification of the specifically disclosed structures that would lead one having ordinary skill in the art to arrive at Applicant's claimed structure to be rendered obvious the above claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
